

Banebot RS-555 + planetary 256:1

Due to events beyond our control, this motor is missing from the starter kit. Have no fear: arrangements have been made to distribute them to the teams. Note that the CRC committee will complete the assembly of the engine before distributing it. Changing the planetary gearbox is forbidden this year.

Here are some technical specifications while you wait:

- 30 RPM unloaded
- Peak torque is 28 oz-in
- Length: 126 mm
- Width and height : 38.1 mm
